University.

ROGER WILLIAMS

DECISION-MAKING IN THE BRITISH CIVIL NUCLEAR POWER PROGRAMMES

An examination of the political, economic, administrative
and technical determinants of the British civil nuclear
power programmes between 1954 and 1974.

The Issues: 1. How much nuclear power and how soon?
2. Structure of the nuclear industry.
3. Which reactor?
4. What fuel policy?

Roger Williams: Senior lecturer, Department of Government,
University of Manchester, U.K. Physics graduate, worked in
operations research, now on one-year secondment with the Science
Council of Canada. Author of European Technology: the Politics
of Collaboration.

A detailed outline of the items to be dealt with by Mr.
Williams is available on request from the Science and
Human Affairs Programme.
